

The Nation's Business

Rinal and official reports on housing in Canada for 1948 are now available. The achievement was creation of more than 18,000 homes.

Another year being the biggest building year on record, 1948 marked the turning point in the post-war housing shortage which Canada suffered with many other countries. New families are coming into existence in Canada at the rate of just over 80,000 a year.

The factors being the quarterly report, "Housing in Canada," just issued by the Central Mortgage and Housing Corporation.

The report shows that since 1945 a total of 276,000 homes have been built in Canada. This means that one out of every 12 Canadian now lives in a new post-war home. It also shows that the building achievement in 1949 will better the 1948 all time high record. While 81,000 homes were started last year, more were started. That means more than 95,000 homes will be finished this year.

There was good news for farmers and builders recently. Wire fencing and nails are made from the same thing—steel wire. Shortage of steel wire caused a shortage of nails. Shortage of nails held up home building. The government's steel control kept an eye on the situation. Last year they ordered all the wire made in Canadian steel plants delivered to nail plants for a few months in the summer. That meant more nails but less wire for fencing.

Steel control keeps in close touch with the United States authorities who were also short of steel and so cutting down on shipments to Canada. However, this spring steel control found it had got some steel wire from the United States, arranged for the purchase of enough to make 58,000 tons of nails. That is being directed to the nail factories, and this summer it won't be necessary to close down on fence factories. Builders will get their nails and farmers will get their fence materials.

Four key officials, two Canadian and two American, have set up as a United States-Canadian joint Military Mobilization Committee. The move rounds out arrangements which the Liberal government has made for cooperation in defence with the United States.

GOING FOR THE U.S.A.?

To avoid possible delay and embarrassment at border crossing points, those who have and wish to foreign exchange requirements before you set out. The travel cost of \$150 per person for the period November 16th, 1948, to November 15th, 1949 is to ensure the latest distribution of the U.S. funds available. For children under 11 years of age, the amount is \$100 U.S. If you are taking a trip to the United States, you need to secure a Form H permit to take out of Canada for any amount exceeding \$10 U.S. or more than a total of \$25 in U.S. and Canadian funds. Form H can be secured quickly and easily from branches of any Canadian Bank.

Random Notes

When Erie decided to concede from the Commonwealth, at the same time she announced that she did not wish to sever all her traditional ties, and would Britain please consider the whole thing just a legal gesture?

This cordial attitude was reciprocated by Britain's governing circles, and Mr. Attlee assured the House of Commons last year that "The United Kingdom government will not repudiate Erie in the category of foreign countries or Erie citizens in the category of foreigners."

But the lawyers have hastened to point out that a good-natured pronouncement in Parliament does not alter the law, and many of them think that as the law now stands the Irish in Britain will, unless they registered as British citizens before April 18, become foreigners and aliens. And an alien cannot be a member of either House of Parliament, a judge, or a King's Counsel, or even a permanent civil servant, though there are Irishmen in these posts.

Meantime, up on March 2, 800 Southern Irishmen had requested British citizenship.

The Lord Chancellor, Viscount Jowitt, has stated that legislation could be introduced now to deal with the position of Irish Republican citizens. Whether or not this legislation will be drafted in a manner to include citizens of the Republic of Ireland, remains to be seen. Probably, it will depend upon the outcome of the Commonwealth Conference now in session in London.

Prime Minister Pandit Nehru has decided the wish of the people of India to become a Republic and yet, somehow, to remain within the British Commonwealth. This desire poses a knotty problem for the Conference. British citizens have certain privileges within the Commonwealth. The attitude of the government of South Africa toward natives of the East Indies, however, has been far from one of fraternal greeting. As a matter of fact, the reverse is the case, for the feeling in the Union of South Africa on the question of Indian immigration can only be described as hostile.

The threat of Communism in Asia, undoubtedly, has had considerable influence on the decision of the governing classes of India in endeavoring to obtain shelter within the Commonwealth, but the provision of a formula will be a delicate matter for solution. That it will be solved, is almost certain. Too much depends upon the outcome for failure to be thought possible.

URGE MORE SAFETY ON ALBERTA HIGHWAYS

Greater safety on Alberta highways is being emphasized by officials of the Alberta Motor Association and other organizations. With the traffic volume now on the increase, it is necessary to be on the alert at local crossings and to guard against other hazards. Already the least crossing toll is causing alarm in different parts of the country.

It also appears there is need for greater education as to pedestrian safety. Recently it was reported in the U.S. that every 75 minutes a pedestrian was killed by a city traffic law. Also, prevent death accounted for 60 per cent of all urban traffic deaths. To cope with the situation, national pedestrian protection contests have been organized. These are designed to carry out or bring about more effective programs leading to a reduction in pedestrian injuries and deaths.

In Alberta, much can be done along the line of increasing pedestrian safety. School safety statistics and public education will accomplish a great deal.

Wedding Bells

Wilson—Davidge

On Tuesday evening, April 12, the McDoval Memorial Chapel in Edmonton was the scene of a very pretty pre-Easter, candle-light wedding ceremony, when Douglas Davidson, younger daughter of Rev. E. and Mrs. Davidge, of Delia, Alberta, became the bride of Kenneth R. Wilson, of Lethbridge, formerly son of Mr. and Mrs. S. J. Wilson, of Bookhurst Hill, Essex, England. The ceremony was performed by the father of the bride, assisted by Rev. J. P. Berry, of Edmonton.

The bride wore a floor length gown of white nylon silk, with sweetheart neckline and short cap sleeves, long net gloves, and a full length veil flowing from a coronet of orange blossoms and miniature white flowers. Her only jewelry was a double strand of velvet pearls, the gift of her groom. The bridal bouquet was a American Beauty rose.

Given away in marriage by her brother, Lennox Heist Davidge, the bride was accompanied by her sister, Mrs. Murray Phillips of Edmonton, as matron of honor, who were a floor length gown of aqua jersey, with sweetheart neckline and matching accessories. Her bouquet was of pink and white carnations.

The groom was accompanied by John H. Clark, of Edmonton, as groom's man. Mr. and Mrs. F. T. Phillips, of Edmonton, attended the ceremony as proxy for the groom's parents who were unable to be present.

Mrs. Helen Berry presided at the Chapel organ for the wedding music, and a accompanied Miss Doris Field, who rendered a solo during the singing of the register.

Ushering the guests was Mr. Murray Phillips. Following the service in the Chapel, the guests gathered for the reception at the home of the bride's sister in the Highlands, where Mrs. M. Phillips and Mrs. F. T. Phillips entertained as joint hostesses. The toast to the bride was proposed by Mr. Joe Woodrow, of Lacombe, and was responded to by the groom. During the reception cabarets from the groom's parents and relatives overseas were received and read.

The bride chose for her going away suit a dark blue gabardine with navy accessories. Following a brief honeymoon in the Edmonton district, Mr. and Mrs. Wilson are making their home in Lethbridge, Alberta.

Sunbeam News

Mrs. Harold Brown, accompanied by Mary, Jackie and Anne, returned to Ketchikan Wednesday afternoon after spending several days at the home of Mr. and Mrs. Arthur Pontifex.

Miss Eileen Hudgeon, from Denver, Colorado, is visiting her mother, who is seriously ill in the Drumheller hospital.

Tommy Hadland, from Kindersley, Sask., was a visitor at the Nelson home Friday.

Bert Holland, who has been a patient in the hospital for the past three months, returned home on Sunday last.

Mr. and Mrs. Joe Twa and family, from Craigmyle, were visitors at the Nelsons' home on Saturday.

Miss Jean Hodge and Harold Place, from Calgary, spent the week end at the Holland home.

Mr. George Smith, from Kindersley, Sask., motored up and spent Sunday with his mother, Mrs. Christina Smith.

Mrs. E. M. Herman returned from the hospital last Monday, and is now convalescing at home.

Miss Rachel Stevens, from Swatara, was a visitor at the Sargent home during the week.

Women's Missionary Society

This April meeting was held in the annex of the church on Thursday evening, the 21st, the president, Mrs. Peter Thompson, presiding.

Mrs. Peters was called upon for the devotional period after the singing of hymn No. 86. Mrs. Peters read from St. Matthew's gospel, chapter 27, 62-66, and chapter 28, 9-10, on account of the resurrection of our Lord, and commented on the latter part of the last verse of chapter 28, and the precious promise contained therein. She also read an appropriate sermonette from the "Liquor Room," and offered prayer.

The secretary-treasurer gave the minutes of the March meeting, and the treasurer's report of the first quarter of 1949. This was approved as read.

It was decided the quilting for the supply work be quilted on May 12th, it having been all prepared and exhibited to the ladies by Madeline E. Lintner and S. Thompson.

After the singing of hymn 681, the reports from the secretaries were read for the first time.

Mrs. Peters reported on supplies; Mrs. Hewson on the press, and Mrs. W. D. Fitzsimmons on temperance and Christian citizenship, drawing attention to the huge profits of the Alberta Liquor Board in 1948. Others commented on a report that for all Canada, the spending of the people for alcoholic liquors exceeded the spent for education by two and a half times, a deplorable and dangerous trend.

Mrs. W. D. Fitzsimmons had charge of the last chapter of our study book, assisted by Mrs. R. A. McPherson and Mrs. S. M. Thompson. This was a study on the Christian church in China, its difficulties and its victories during and since the war years, and its use now for church schools, teachers and evangelists. This proved to be very interesting and challenging.

The Roll Call was answered by verses on the resurrection of our Lord.

The Easter Thanksgiving was then received, after which hymn No. 485 was sung, and the meeting closed by our president's prayer and the Mission benediction.

During the social half hour, Mrs. R. A. McPherson served a delicious lunch and a friendly half hour was enjoyed by the members present.—Con.

Mr. Bert Roy is restricting acquaintances in the district.

Miss Ida Templeton, from Calgary, spent several days visiting at the Nelson, Waters, and Dick homes during the week.

Mr. and Mrs. John Smith, from Calgary, were visitors at the Smith home over the week end.

Miss Teresa Reamer is spending the week in Calgary with her parents.

Mr. Christianson is a patient in the Drumheller hospital.

Mr. and Mrs. Allan Hodge, from Onda, motored down and spent Sunday at the Smith home.

Mrs. John Carter returned from Calgary on Monday, after spending the past six months in the city.

The April meeting of the Sunbeam W.M.S. was held at the home of Mrs. George Ross. The meeting will be held at the home of Mrs. Munn, in Munson, on the afternoon of May 12th.

Calgary visitors during the week were Mrs. Kingzett, John Hunter, Bob Cunningham, Teresa Ross, and Mrs. M. M. Munn, Mrs. Geoffrey, Donnell, and Lindsay Desrope, all of Edmonton; visited the home of Mr. and Mrs. Ed. Desrope last week.

John Connors has sold his farm, (near Craigmyle), to Fred Marshall, of Craigmyle.

BEAT THE TOUGHEST LOGGING HAULS

with GOOD YEAR LOGGING TIRES

WILLIAM GIBSON PHONE 21 L.H.C. & FORD SALES & SERVICE

1949 Hail Rates

The Alberta Hail Insurance Board announces that the premium rate for hail insurance in 1949 is to be the same, from four to twenty

per cent as in past years. Each township is taken as a unit, and rates are based on losses from 1919 to date. About one-fifth of the township will have lower rates this year. The Board has a surplus of \$1-.

It's been a busy year!...

This week many thousands of Canadians will be reading the story told in Imperial Oil's annual report. It is a story of how, to meet your needs, Imperial last year found more crude oil, produced more crude, transported, refined, distributed and marketed more oil and products than ever before.

To do this we had to spend a lot of money. We sent men ranging over thousands of square miles in the search for new oil fields—and we found new oil. We built new ships... new pipe lines... new refining units... new marketing facilities... and a host of other things. Again last year we spent more money than we earned, but it was an investment in Canada's future as well as our own.

We raised most of the money we needed by borrowing and by selling some of our major investments; the rest we earned by putting back into the business after paying dividends.

On the year's business we made a profit of less than one cent a gallon on products sold. This amounted to 4 and 9/10ths cents of each sales dollar we received.

It was a busy, successful, interesting year. When it began we were sometimes hard pressed to meet all your needs, when it ended our supplies were assured. It saw new oil discovered, making Canada less dependent on foreign supplies; new equipment added, helping to serve Canadians better with the products they need.

Bringing you oil is a big job—and a costly one.

If you're interested in facts...

In 1948 oil was refined in all phases of Imperial Oil's operations. It was sold refined by the company to find and produce in Canada during 1948 were planned and if they would meet 183 million.

Imperial's eight refineries added to the company's fleet. The latter group was extended to include the following: 1. 2 pipe line from Edmonton to Regina; 4,711 miles, one owned and 1,500 miles leased; 2. 2 pipe line from Regina to Winnipeg; 1,500 miles, one owned and 1,500 miles leased; 3. 2 pipe line from Winnipeg to Minneapolis; 1,500 miles, one owned and 1,500 miles leased.

Imperial's eight refineries processed an average of 125,075 barrels per day, a new record. Sales totaled 1,819,000,000 gallons. On its operations the company earned \$10,672,612, a profit of 15.102 of a cent on each gallon of the 1,813,000,000 gallons sold. From its investments the company earned \$1,598,907.

ARCHBISHOP HONORS CANADIAN WAR DEAD—A wreath is placed on grave of a Canadian who died in battle by Archbishop Joseph Charbonneau of Montreal during visit to Italy. He was accompanied by Archbishop Maurice Roy of Quebec. Grave is that of Pte. J. A. Beaudry of Royal 22d Regiment.—S.N.S. photo.

NEWFOUNDLAND'S CREST—Chips by as Prime Minister St. Laurent starts work on Newfoundland's crest, to be carved into the blank space left on the arch of the Peace Tower at Ottawa for such an occasion. Symbolic picture was made during the celebration of the union.—S.N.S. photo.

WINS EXTRADITION FIGHT ON MURDER CHARGE—Extradition denied by Judge Ambrose after in a Toronto court, Arthur Mathys, Belgian underground fighter, shown here with wife and daughter Ilona, walked out of court a free man. He was sentenced to three years in prison by the Belgian government on charge of murder of Arsene DuVos in September, 1944. Judge Shaw refused to grant application made on behalf of the Belgian government that Mathys be sent back to his native country to face a charge of murdering a Nazi collaborator. Mathys, as a Belgian underground worker, faced death at the hands of the Nazis many times during the war. He has been in Canada since 1947 and will return to Tuluzy, Ont., where he has been living and working.—S.N.S. photo.

TRUMAN'S EX-PARTNER IN ISRAEL—A former business partner of President Truman, Eddie Jacobson is shown with his wife visiting Israel's President Chaim Weizmann, in Tel Aviv. Weizmann is coming to the U.S. to be guest of honor at an affair held under auspices of New York Council of the American Committee for Weizmann Institute of Science.—S.N.S. photo.

IN MEMORY OF AN ISRAELI HERO—The tears of a young Israeli widow and mother water the small evergreen sapling which she has just planted in memory of her husband who died fighting for the world's newest state. Relatives of others who died in the fighting stand beside the trees they too have dedicated to the memory of loved ones who have fallen in battle.

LITTLE MAN GETS INTO BIG MAN'S ACT—Eleven-month-old infant of a visit to the U.S. Winston Churchill in New York about the Queen Mary. While posing for newspaper and press photographers, Churchill for once failed to give his famous "V" sign. But a little boy provided the evening by substituting for the great man. Churchill, who was amused and pleased, duplicated the familiar "V" symbol a moment later. The unidentified youngster was one of a group of visitors who crowded the ship's sun deck for a glimpse of Mr. Churchill.—S.N.S. photo.

LATEST EQUIPMENT—Physics students at the University of British Columbia's "Open House" demonstrate the latest equipment by which eggs are candied.

NINE-MONTH-OLD BOY SAVED—The open pin lodged in throat of Peter Wright, nine months of Kitchener, Ont., is shown in x-ray. He was rushed 80 miles to the Hospital for Sick Children in Toronto. Safely removed of the pin, Peter is cared for by a nurse at the hospital. Police cruisers cleared the way to Toronto after Kitchener doctors told Gerald Wright, father, that they could not remove the pin.—S.N.S. photo.

BULL FLOWN TO CANADIAN FARM—New resident of Canada is the registered Hereford bull sent in the plane which carried him from the U.S. ranch at Knoxville, Kansas, to the Ontario farm, Peterboro, Ont. The animal is worth more than \$5,000.—S.N.S. photo.

TWO OF ENGLAND'S MOST FAMOUS SPORTS EVENTS—"Nook-and-neck" finish, pictured here, marks one of the hardest-fought "boat races" on record as Cambridge leads by a quarter-length in the annual 4 1/4-mile event on the Thames to Oxford University. It was Cambridge's 30th win in official races against Oxford's 43. Time, from Putney to Mortlake, was 18 minutes, 57 seconds.—Rafter photo from S.N.S.

STUNTING EXHIBITION ENDS IN DEATH—Exhibitioners and for two U.S. Air Force officers came in the flying wreckage of this pre-war type plane near New York, Ont., after a demonstration of low-altitude stunt flying for relatives and friends. The two, Laurel Tucker and Eugene Owen, both of Flint, Mich., killed in the crash, were coming out of a roll when the motor cut out at 800 feet, said witnesses. They were en route to Buffalo, N.Y., when the aerial gymnastics caused their death.—S.N.S. photo.

HAPPY MOOD—Princess Margaret looking very smart in a jaunty hat and suit and her father, King George VI, in a happy mood when they walked through the streets of London after the king had given a day's holiday to the streets with thousands of adults to welcome the young princess, who fulfilled a crowded program of engagements.—S.N.S. photo.

Still at Aintree, Eng., came at the first of the 50 jumps in the Grand National steeplechase. Stone Cottage is shown as he times his jockey, St. Regis, in the four-mile race. Rampion Horn, a longshot, became the "bar" of the race when he finished eight lengths ahead of Rampion. Royal Mount was third.—S.N.S. photo.

Whaling Is Manitoba's New Industry

WINNIPEG.—Manitoba's latest industry is being built by its promoters on a whole of enterprises—on ship or exaggeration intended.

The industry is purely fish—whaling.

Two thousand or more souls from the bosoms of the mainland appear to have taken to the water in small boats, chasing the whales, and the brother, the blubber of whale meat.

The industry with its headquarters at Churchill, Man., where a factory is being built, summer, also plans to utilize the resources of the 1,500 pound oil-bearing mammals after delivering the approximately 600 pounds of blubber fat.

The use of fish has been described as negligible for fishermen and quality of the oil used for oiling engines and machinery and fish waste.

The industry plan to bleed the whales, meat, bone, hide and formula, plus to the fur farming industry. The large whale which may be used as a special feed for female milk and fat, for use before infants are born and to feed young animals after they have reached the weaning stage.

Managing the enterprise, which is to get under way in the fall, will be Karl Kruke, veteran of Norwegian whaling, and John A. McNeil, of the Atlantic in the 20's.

A seasonal industry, with the factory expected to operate on a 24-hour processing basis from June 15 to Sept. 15, the commercial whaling will give employment to approximately 40 persons and will be a source of revenue to offshore Churchill, Manitoba where it is the port.

Whaling is being described by the industry as an exciting sport, is expected to go out of the water when the industry first started. The sport of whaling, one reason being that the whaling can be done in the summer months, and the whaling can be done in the summer months.

Although this summer will see the initial start of commercial whaling in Manitoba, the project has been considered for many years. Last summer preliminary studies were made with a view of erecting a large main building, containing a large crane, a 1,500-horsepower electric generator, 400-horsepower steam-driven pumps, and a 20-foot wall.

When the factory which will be given solid storage treatment while awaiting rail shipment to various Canadian centers.

The number of whales handled will depend on the luck of the hunters but the total for the season is not expected to exceed 600. This would mean the processing of approximately 1,000,000 pounds of whale.

Yeggs Have To Work To Succeed

BALTIMORE.—Even mules will be getting tough. Times buyers have been told for what they get.

Recently thieves broke into a bar and snatched with \$1,000. The police report the crime was done by a man who had to get it.

There is a 20-foot wall. Rip upon a heavy crane and force a window.

From a door leading to the basement.

In the basement, force another window to a store.

Log a heavy safe over its side and make an eight-inch hole through the heavy safe. They broke that lock, too.

SACRED GANGES WATER

NEW YORK TO MONTREAL.—Eight pounds of water from the Ganges river was sent by plane to Montreal, where it was used to bless a statue of the Virgin Mary before it was shipped to India.

The water, packaged in wooden barrels, was shipped to New York from Calcutta. It was consigned to J. J. Williams of the Mount Loretto, N.Y.

DRIVE FOR FISHING

KITCHEN MEDITATIONS

After the Holidays
—BY JANE DALE

The home is quiet now; the "Yuletide" has passed. The midnight lights are burning dim as they did in the holidays.

There is a fragrance left. Their feet, both wet and muddy, a whiff of winter in every room. There is a breath of spring's first touch.

I love the holidays. They are a time when all comes home. Warm memories but we wander far, on no future path, no wonder far. There is that chimney hour. When we sit the home again. When we spread our deep desires. Then our talks again at night.

The home is quiet now. There is no "Yuletide" light and gay. There is fragrance left in the home. There is a breath of spring's first touch.

HERE'S AN OFFER
TOO GOOD TO MISS

25 lb. Pail of Marvelube and a
Grease Gun at ONE LOW PRICE!

Alomite Hand Lever Gun Offer

For its low price, this little hand lever gun is a real surprise. Light to carry, yet it exerts enough pressure to force the grease through all moving parts. Can be used for all types of lighted, heavy-bodied or fibrous greases.

Alomite Pressure Gun Offer

An ideal outfit for those who operate a lot of equipment. This pressure gun, with flexible hose, is carried to the top of the pail. Light enough to be carried anywhere. Strongly constructed. Saves time and keeps grease clean. Gives high values for your money.

Marvelube No. 11 is the ideal grease for farm machinery. It will protect all the chassis-body for full protection.

THE AGING LION

Events happening on the Yangtze River last week suggest that a bad blunder was made either by the British Admiralty or at the Foreign Office. British seamen have been wounded and killed on what is described to have been a "peaceful mission" to provision the embassy at Nanking and it is freely predicted that either of the departments involved might have a difficult time satisfying critics that they were right in having a warship proceed up river between the belaguered fortifications.

There were reports that Royal Air Force planes in Malaya have been readied for use in China, but these have been officially denied. In any case, since intervention in the Chinese civil war is, apparently, now definitely ruled out by the State department in Washington, such action would be entirely futile.

Four judgments on the part of someone is responsible for the deplorable circumstances, which reflect somewhat dimly on British prestige. It is just one more humiliation added to those which have been heaped upon the ageing lion during recent months, when even Chili and Argentina have established posts in British territory and remain there undisturbed, completely ignoring polite requests for a reference of the disputes involved to the International Court of the Hague.

STRENGTH OF A NATION
Atomic war is today a threat so terrible that men hold the thought of it at a distance, to keep it from penetrating into their minds. Yet for this generation, as for every other in history, there is a penetration into the heart of society that threatens a slower but no less sure extinction. Moral decadence has eaten out the heart of civilizations before ours.

The evidence of moral malnutrition lies around us in every village and town, farm and factory. The young couple who were tricked into the belief that romantic love alone was the basis for entering marriage and lost to a fair chase to build a home; the moral chaos in the lives of teenagers by their pathetic and futile chase of the thrill that satisfies; the public enemies who make money out of moral defeat and care not a damn for the hell on earth they cause; these are only a few of the symptoms. It would be a boy named who would argue that better schooling and penitence have cured this cancer in modern life.

The strength of a nation is measured by its fight for purity. Absolute purity is a positive, vibrant force that arrests the decline of civilization and sets men and women free. It can be found by any one at any time.

A man or a woman can do three things with sex energy. The first two are the common ways of indulgence and repression. The third way is rare, but valuable beyond price. It is the redirection of this energy into creative caring for people and the fight for a decent world. Absolute purity takes discipline. Yet mind and will are like sawdust before the assault of the hell unless they are reinforced by a stronger power. When trouble knocks at the doors of the mind, one cannot fight it alone. Only the mind and will, reborn in the power of God will know the amazing freedom of absolute purity.

Water in its natural state has certain vital uses. Water heated and turned into steam can run engines which water alone cannot move.

So with these energies of affections. They could be used in the reproduction of the race, in the reinforcement of the heart and mind and will, and in a remembrance of culture and creative living.

If even a minority of people in any community capture the lifting power of absolute purity and pour the energies of their caring into the national blood stream, then health and prodig-

"I trust them
more than I'd trust myself"

The BANK's the place for my money. I always put part of my pay into my bank account—otherwise it burns a hole in my pocket. I guess I trust the bank more than I trust myself! I figure that's one reason why my savings have been building up the way they have.

Another reason I'm sold on a bank account is that I always know just where I stand. All I have to do is take a look at my pass-book. They're a lot better bookkeepers than I am.

What's more, what's in my pass-book is my business, and I can count on the bank people to keep their mouths shut about it. And that suits me just fine!
